

# MINERAL OIL

**Mineral oil** or **liquid petrolatum** is a by-product in the distillation of [petroleum](#) to produce [gasoline](#). It is a transparent, colorless oil composed mainly of alkanes (typically 15 to 40 carbons) and cyclic paraffins, related to white petrolatum. Mineral oil is a substance of relatively low value, and it is produced in very large quantities. Mineral oil is available in light and heavy grades, and can often be found in drug stores.

# The Effects of Mineral Oil

Listed below are just 4 reasons why not to use products that contain mineral oil:

1. Mineral oil masks itself as Estrogen. Making women Estrogen Dominant, which throws off our hormone levels causing many side effects such as: Depression, weight gain, thyroid problems, breast cancer, etc?
2. Mineral oil blocks the pores from releasing toxins. Toxins are then found in lymphoid and breast tissue of breast cancer patients.
3. Mineral oil blocks the skin from ever receiving moisture, thus your skin will be dry each day.
4. A 1996 John Hopkins Study list Mineral oil as the #2 cause of aging.

**Take a look at the ingredients of your skin care and personal care products. Do they contain Mineral Oil???**

*All Arbonne products are formulated without mineral oil. They are formulated in Switzerland where mineral oil is illegal to use in beauty products.*

Please, keep yourself and your family safe.  
Do not allow yourself repeat exposure to this toxin!  
Please commit to using products that DO NOT contain mineral oil.
